Product Manager with 3+ years of experience building AI-powered platforms, agentic systems, and enterprise SaaS products. Key contributor to Paradox AI's growth through a unicorn exit and acquisition by Workday. Experienced in owning ambiguous problem spaces end-to-end, partnering closely with engineering on LLM-driven systems, APIs, and extensible workflows, and delivering measurable impact at scale. Known for strong product judgment, systems thinking, and cross-functional leadership in complex environments.

EXPERIENCE

Product Manager *Paradox AI (Acquired by Workday), Scottsdale, Arizona | January 2025 - Present*

- Led the development of an agentic AI assistant platform, transforming a routing-based support experience into a task-executing, API-backed system capable of automating complex workflows across multiple product surfaces
- Analyzed 29,000+ real-world interactions to identify automation opportunities, informing roadmap decisions that drove 40% adoption growth, 30% deeper engagement, and 60–80% time savings on routine workflows
- Owned multi-quarter product strategy across four product areas, balancing short-term delivery with long-term platform investments to modernize legacy systems and expand self-serve capabilities
- Drove LLM-powered capabilities by establishing AI evaluation frameworks using Langfuse, cohort analysis, and model performance reviews to ensure quality, reliability, and user trust in production
- Owned an internal self-service content and workflow builder, partnering with engineering on architecture and extensibility to support scalable configuration and reuse
- Partnered cross-functionally with engineering, design, data science, and AI teams to drive the full product lifecycle and establish guardrails for production LLM systems

Associate Product Manager *Paradox AI, Scottsdale, Arizona | August 2023 - January 2025*

- Led consolidation of a legacy Care Onboarding portal into a centralized CMS, unifying multiple systems into a scalable platform supporting document uploads, AI-generated responses, mass approvals, and real-time syncing
- Owned ideation, delivery, and iteration for AI-powered, developer-integrated workflows, supporting conversational AI features end-to-end
- Managed experimentation and product analytics to identify performance gaps and drive continuous improvements in user experience and system effectiveness
- Partnered with engineering to design a centralized prioritization and intake model, improving cross-team alignment, resource allocation, and decision-making
- Conducted customer and stakeholder research to inform roadmap decisions across personalization, context awareness, and AI-driven content delivery

Senior Product Content Specialist *Paradox AI, Scottsdale, Arizona | October 2022 - August 2023*

- Partnered with Fortune 500 enterprise customers to design and optimize high-volume conversational AI flows, ensuring scalability, brand alignment, and quality
- Monitored system performance metrics (completion rates, sentiment, intent accuracy) to identify optimization opportunities and inform product direction
- Authored product best-practice documentation used by internal teams and external partners to enable consistent implementation
- Collaborated with Product, Engineering, and Design to translate customer requirements into launch-ready platform capabilities
- Led KPI analysis across adoption, revenue impact, and implementation timelines to validate product investments

EDUCATION

Bachelor of Science in Business Administration, MIS & Marketing
Northern Arizona University | April 2021
